

Billi Chilled Filtered Water Systems

The Billi Alpine undersink chilled water system stands out as one of the smallest undersink watercoolers of its kind on the market today.

Thanks to the new and improved eco-friendly cooling technology, this advanced system offers ultra-quiet operation.

Now with Sparkling Water models available, prepare soda drinks with the luxury of sparkling water on tap.

The powdercoated chiller cabinet houses the advanced technology packed inside this high capacity system while a stylish chrome faucet is located neatly on the sink.

Quality multistage filtration ensures excellent taste and maximum satisfaction!

Replacement filter cartridges are Quick-Change design for simple installation by any staff member.
