

## Uniflow® Scale Reduction Cartridges

Uniflow® Scale inhibiting cartridges contain food-grade hexametaphosphate which reduces scale and rust buildup in water appliances.

This type of treatment is recommended for use with food service equipment including boiling water systems, steam ovens, coffee machines and ice appliances.

**Carbon Block Scale Reduction** - Designed to combine the benefits of carbon block activated carbon technology with excellent sediment, chlorine taste & odour reduction, with scale inhibiting properties.

Available in 10" and 20" standard diameter lengths

**Granular Carbon Scale Reduction** - Ideal for use on coffee machines and boiling water systems, granular activated carbon is used to correct taste & odour included with the scale inhibiting properties of hexametaphosphate.

### Benefits

- Scale protection for boiling water
- Food-grade hexamaphosphate
- Carbon Block or GAC
- Suit standard 10" and 20" housings

### Applications

- Food Service
- Boiling water appliances
- Steam ovens
- Coffee machines

Order Code	Size	Description	Typical Flow
<b>Carbon Block</b>			
FCB-1025-P	10" x 2.5"	10" Carbon Block Scale Reduction Cartridges - 10 Micron	7 LPM
FCB-2025-P	20" x 2.5"	20" Carbon Block Scale Reduction Cartridges - 10 Micron	14 LPM
<b>Granular Carbon (GAC)</b>			
FCG-1025-P	10" x 2.5"	10" Granular Carbon Scale Reduction Cartridge	12 LPM
