

Aquastream Quick Change 'Arc' Water Filter System

The advanced Quick-Change Water Filter System delivers beautiful tasting drinking water for Australian homes and offices.

The stylish 'Arc' chrome dispenser tap is mounted neatly on the sink and compliments the modern home.

Our premium grade carbon block water filters are made in the USA and are certified to reduce chlorine, taste, odour, chemicals, sediment and cysts leaving water just the way it should be!

Compact yet powerful, the Quick Change requires minimal space under the sink and can be mounted horizontally to simplify installation

Hygienic and extremely simple to service, replacement of the water filter cartridge is required every 6-12 months, when taste returns or the flow slows down.

Aquastream's unique multifunction water connection kit makes installation simple and compact and built in pressure surge protection for the system.

Multifunction Valve

Benefits

- Pure, freshly filtered, great tasting water
- Powerful carbon block technology
- Fine 0.5 micron performance (nominal)
- Protects from cysts (giardia, cryptosporidium)
- Compact, space saving design
