

Aquastream NanoSilver Rainwater filter system

The Aquastream NanoSilver rainwater filter system is ideal for rainwater supplies and provides protection from 99.9% parasites and bacteria while producing beautiful tasting water.

Incorporating the The advanced UltraPleatHD Sub-Micron Electrodsorptive media technology in the second stage filter provides 99.9% reduction of viruses, bacteria and cysts such as Cryptosporidium and Giardia, as well as reduction of heavy metals and improving taste and odour of the water.

Supplied with the stylish Aquastream 'ARC' chrome dispenser tap mounts neatly on the sink while the dual purifier is housed under the sink.

Benefits

- NanoSilver Electrodsorptive technology inside
- Protects from 99.9% bacteria and cysts
- Ultra Fine 0.2 micron performance
- Designed for rainwater supplies

Applications

- Mains Water
- Rainwater system
- Lead reduction
