

## Uniflow® Polyspun Sediment Cartridges

The Uniflow range of Polyspun Sediment Cartridges offer graded density filtration for high sediment loading and are an excellent all-round pre-filter for a wide range of applications.

Constructed from a strong self-supporting structure, polyspun cartridges will not deform under pressure in standard filtration applications.

These cartridges effectively reduce dirt, rust, scale and sediment. Designed to suit a wide range of industry standard housings, these cartridges are ideal for both pre-filtration and final-stage filtration applications.
