

Uniflow® Pleated Carbon Cartridges

Uniflow® Pleated Carbon Cartridges are ideal for rainwater tanks, bores and whole house systems, providing high capacity sediment reduction and advanced taste and odour reduction in a single dual purpose cartridge.

Manufactured from carbon impregnated non-cellulose media, these cartridges resist bacterial attach, making them suitable for non-chlorinated water supplies such as bore or rain water

Available in 2 length options – 10", 20", with Standard and Large diameters, choose from a wide range of micron ratings to suit your application.

Benefits

- High capacity sediment filtration
- Taste & Odour reduction
- Bacteriostatic
- Suitable for alternate supplies

Applications

- Drinking Water Filtration
- Rainwater
- Town Water
- Bore water

Order Code	Size	Micron Rating	Description	Flow (LPM)
